DETAILED ACTION

This Office action is in response to the amendment filed January 26, 2004 in which the specification was amended as well as claims 67-170.

1. Regarding the new matter to the specification, Applicant has corrected all of the subject matter that was objected to with the exception of page 9, line 12-13. The original filed specification supports the metal deactivator preferably comprising between 0.05 and approximately 0.15 parts by weight, and most preferably approximately 0.1 parts by weight. The specification does not support the proportions that Applicant added by amendment.
2. The rejection of claim 90 is withdrawn in view of applicant's arguments.
3. Claims 162-170 are rejected under 35 U.S.C. 112, first paragraph, for the reason of record.

Applicant argues that the specification supports non-platinum as an alternative embodiment since Mn and Ce are not platinum.

The examiner respectfully disagrees. Non-platinum is not limited to those elements recited in the specification, i.e. Applicant's list is not exhaustive of non-platinum organometallic compounds.

4. The rejections of claims 67-170 under 35 U.S.C. 112, second paragraph, as being confusing with respect to iron-containing organometallic compound, the non-platinum organometallic compound and the fuel composition and units are withdrawn in view of the amendment to the claims.
5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 1714

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 67-170 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support in the specification for less than approximately 0.005 parts by weight of said organometallic compound. The claim as written has no lower limit for the amount of the compound that may be present in the composition.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

8. Claim 67-170 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 67 is rejected because there is no lower limit for the amount of iron-containing organometallic compound present in the composition.

Claim 73 is rejected because of the recitation of the trademark Primene[®]RB-3.

Claim 81 is rejected because of the recitation of the trademark Conosolve[®]C-

145.

Claim 95 is rejected because of the recitation of the trademark Vancide[®].

Art Unit: 1714

Claim 162 is rejected because the language "between less than approximately 0.005 parts by weight" is confusing. If 0.005 part is the upper limit, there is no lower limit, and if 0.005 parts is the lower limit then there is no upper limit.

The prior art made of record is cited for teaching fuel compositions containing organometallic compounds.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
